DOCUMENT-IDENTIFIER: US 5885617 A

TITLE: Moisture barrier film coating composition, method, and coated form

Brief Summary Text (19):

The soya lecithin, which may be ALCOLEC soya lecithin made by American Lecithin Company, for example, acts as an anti-tack agent, and surprisingly, and unexpectedly, acts as a plasticizer by locking moisture in the coating so the coating stays flexible and not brittle. Surprisingly and unexpectedly, this locked-in moisture in the coating, while contributing to plasticization, does not compromise the moisture barrier properties of the overall coating.

Detailed Description Text (24):

It was unexpectedly found that soya lecithin, included for its tack reduction properties, acts as a plasticizer by locking moisture in the coating so as to keep the coating flexible and not brittle. It is also considered unexpected that this moisture while contributing to plasticization, does not compromise the moisture barrier properties of the overall coating.

TITLE: Skin conditioner

Detailed Description Text (11):

Proto-Lan 8 is a trade name for a combination of lecithin, butyl stearate, cocoyl hydrolyzed collagen, oleyl sarcosine, sesame oil and lanolin alcohol. Proto-Lan 8 is a non-greasy, non-tacky, oil soluble emollient based on naturally occurring phospho-lipids complexed with lipo-poly peptides and lipo-amino acids. Proto-Lan 8 is rapidly absorbed by the skin and provides relief from dry chapped skin while providing long lasting moisturization.

TITLE: Purifying and clarifying de-oiled soya phosphatides - for use in food by dissolving separating insol. constituents and expelling solvent

Basic Abstract Text (1):

De-oiled soya-phosphatides (I), so-called soya pure lecithin, are purified and clarified by (i) dissolving the phosphatides obtd. by standard methods from crude soya oil, (ii) mechanically separating the insol. constituents from the soln. and then (iii) removing the solvent. Treated (I) are used as foodstuffs or food additives. Light-coloured, compact, transparent, non-tacky (I) are obtd., free from undesirable or toxic residues, which can be processed to loosely structured flakes or granulates.

Dec 30, 1997

DOCUMENT-IDENTIFIER: US 5702714 A

TITLE: Skin conditioner

Detailed Description Text (11):

Proto-Lan 8 is a trade name for a combination of lecithin, butyl stearate, cocoyl hydrolyzed collagen, oleyl sarcosine, sesame oil and lanolin alcohol. Proto-Lan 8 is a non-greasy, non-tacky, oil soluble emollient based on naturally occurring phospho-lipids complexed with lipo-poly peptides and lipo-amino acids. Proto-Lan 8 is rapidly absorbed by the skin and provides relief from dry chapped skin while providing long lasting moisturization.

Current US Original Classification (1):424/401
